WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Make four by laser sintering in PA12 from the model;
any online print service. No supports needed.
Body 33 mm outside, 23 mm bore, 10 mm long.
Back: inner lugs 8 mm wide, top and bottom, 11.5 to
13.9 mm from the centre. Front: outer lugs, 14.1 to
16.5 mm. Lug ends are rounded about the pin.
Pin holes 2.0 mm (ream after printing), 2.6 mm from
each lug's root face, top and bottom.
Wire holes 1.2 mm on the two sides, 14 mm from the
centre; run a 1.2 mm drill through each.
The faces close at 18 deg: that is the joint's stop.
Check: two links pin together and swing 18 deg each way.
