WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Lathe: 29.25 mm spigot 14 mm long, 33 mm flange 8 mm,
12 mm bore through. The spigot is a close slide fit in
the nose's 29.3 mm bore.
Front: leave a 4.9 mm stub at 33 mm outside; mill it
away to two outer lugs, 8 mm wide, top and bottom,
outside 14.1 mm from the centre; round the lug ends.
Drill 2.0 mm pin holes 2.6 mm ahead of the flange face.
Wire holes 1.2 mm, drilled on a slant: from 10.5 mm out
and 1 mm low at the back face to 14 mm out on the
centre line at the flange front (a drill jig helps).
Two dimples 1.5 mm deep, 7 mm from the spigot's front end,
on the sides, for the M3 grub screws in the nose.
